Course Title   The 4 Disciplines of Roll-Outs

Course Overview:

This course is aimed at providing teams with the 'know-how' and the 'why to' of implementing a strategy for successful roll outs; whether that be an upgrade or install of a new IT system or any type of systems, process of policy roll out project.

Any roll out involves people, communication, goals, objectives, testing, end-users, deadlines, and often a great deal of stress and overtime!

This workshop provides the framework and the 4 steps required to ensure a successful rollout, on time and on budget.

Your team will work on either a live project, up and coming project or a fictitious project, the choice is yours.

Target Audience: Ideal for Teams involved in delivering a project on time and on budget

Duration: Four Days – 1 day per discipline
